## IMPORTANT MESSAGES

---

---

Whilst every care has been taken to ensure the accuracy of the contents of this Directory, it is important that Certificate Holders and Agents check their respective entries and advise the AGA of any errors and/or omissions. It should be noted that the contact details for individual Certificate Holders and Agents are included under an Index at the back of the Directory.

The Directory is available *free* from the AGA website ([www.aga.asn.au](http://www.aga.asn.au)) and will be republished periodically throughout the year with appropriate changes included. The online Directory may be printed in full, or in part, if required. Please note that hard copies of the Directory are no longer available for purchase from AGA.

To assist in ensuring the accuracy of AGA records, would you please advise of any alterations or corrections by completing the following form and faxing this page to:

## PREFACE

The Australian Gas Association (AGA) manages and operates accredited Product Certification Schemes, with funding largely provided by Certificate Holders through certification fees and badge sales. The AGA is an active participant in the standards writing process with representation on many *Standards Australia* committees that develop and publish the standards that underpin the Schemes.

In addition to product certification services for the electrical and plumbing industries, the AGA certifies gas product for the following categories or any combination of these categories:

- Natural Gas
- Town Gas
- Tempered Liquefied Petroleum Gas
- Liquefied Petroleum Gas

Approval for Liquefied Petroleum Gas appliances is divided into three sub-groups, designated as P (Propane), B (Butane) or U (Universal) gas.

### **Product Compliance:**

Product that has been certified by AGA to comply with the requirements of the relevant Code/Standard, is subject to the Rules Governing the Scheme and, if required under the Scheme, is subject to routine and regular audits to confirm continued compliance.

#### DONG YANG

- 6845 8.05 Appliance Regulators Models: DR1CAE  
(Inlet and Outlet ½" BSPP),  
DR1CAE-1 (Inlet ½" BSPP and Outlet  
Special Purpose – G ½ threaded, 5 kPa (NG)  
with seat for sealing washer\*) 7 kPa (LPG)  
Note: \*The special purpose connection  
on the outlet of DR1CAE-1 is for  
manifolds and fittings with a flat formed  
or faced end and G ½ threaded male  
compression nut.  
A sealing washer is supplied with this model  
of regulator to be inserted between the end  
of the manifold fitting and the washer  
seat in the outlet of the regulator. No other  
sealing compound is required at this connection.

safety parameters are set.  
Classification depends on the setting of  
safety parameters governing re-ignition,  
flame failure behaviour and flame  
establishment period.

| 100mm     | Sizes 4"      | V5055*--- | 105         | 2 |

Available with NPT/BSPT/4" Flange.

Higher pressures applicable for V5055D, E versions.

|           |                                  |
|-----------|----------------------------------|
| V5055A--- | Low pressure on/off              |
| V5055B--- | Low pressure characterized valve |
| V5055C--- | Low pressure. Double seat        |
| V5055D--- | High pressure on/off             |
| V5055E--- | High pressure. Double seat.      |

The above operate with actuators as follows:
