### VENT VALVES (AS 4629)

**NOTE 1: Unless otherwise specified in the listings below, the temperature rating covered by AGA certification is from 0°C - 60°C.**

**NOTE 2: Also see heading Automatic Shut-Off and Vent Valves**

#### Ascomation Pty Ltd

##### ASCO

**2508 4.76**

030 Series Disc on seat valve. D.A. Sol.

|    |       |            |    |    |   |
|----|-------|------------|----|----|---|
| 20 | ¾ BSP | # * 030B83 | AC | 14 | 2 |
|----|-------|------------|----|----|---|

Ambient Temperature 0°C to 60°C

# denotes Coil and Enclosure Type

AG, AGU, AGUS, AGSC, EAAG, VMAG, WSV MAG, NEAG, WSAG, PAAG, NCAG and WPAG.

\* denotes Thread Type

'B' NPT, 'D' BSPT and 'E' BSPP

Solenoids AC only, 12V-440V

(Consult Ascomation for options)

**2509 4.76**

210 Series. Disc on seat valve. Diaphragm Sol.

F52 and K52 Series 15mm-150mm Reduced Bore Automatic

Pneumatic Vent Valves 5000 2

05\*52-\*\*66\*\*/10RDB40, 07\*52-\*\*66\*\*/10RDB40,

10\*52-\*\*66\*\*/10RDB40, 15\*52-\*\*66\*\*/15RDB40,

20\*52-\*\*66\*\*/20RDB40, 30\*52-\*\*66\*\*/33RDB40,

40\*52-\*\*66\*\*/35RDB40 and 60\*52-\*\*66\*\*/42RDB40

Note:

1. 3<sup>rd</sup> character '\*' designates F, K or A variation

2. 6<sup>th</sup> and 7<sup>th</sup> characters '\*\*' designate body material

ie 44 = Carbon Steel, 66 = Stainless Steel,

10<sup>th</sup> character '\*' designates seat material ie T = PFTE,

R = RPFTE, 11<sup>th</sup> Character designates stem seal material,

ie T = PFTE, Z = Graphite

3. The AGA approved actuator/valve combination are based upon a specified rated supply pressure (air) of 550 to 700 kPa.

4. Optional Norbro J-Switch proving and position indicating switch boxes, ASCO silencers & Automatic XCL/XML Ultraswitch.

### VENT VALVES (AG 214)

**NOTE: Unless otherwise specified in the listings below, the temperature rating covered by AGA certification is from 0°C - 60°C.**

#### OneSteel Piping Systems A Business of OneSteel Trading P/L EMICO/EL-O-MATIC

**6566 3.04**

Emico Full Bore Ball Valves/El-O-Matic Spring to Close

Actuator

|    |     |            |      |   |
|----|-----|------------|------|---|
| 15 | ½"  | V 15 * *** | 5000 | 2 |
| 20 | ¾"  | V 20 * *** | 5000 | 2 |
| 25 | 1"  | V 25 * *** | 5000 | 2 |
| 40 | 1½" | V 40 * *** | 5000 | 2 |
| 50 | 2"  | V 50 * *** | 5000 | 2 |

V: Vent valve – Emico EA 305A or EA305C

\*: Body construction ie A = Stainless Steel, B = Carbon Steel

\*\*\*: Limit Switch APL = APL310N (general purpose),

HDX = El-O-Matic HDX model H2 (explosion proof)

Additional Package Details:

Actuators – El-O-Matic models:

15mm package: ES0012.MIA0202A.09K (ES12 prior to May 2003)

20mm package: ES0025.MIA04A.11K (ES25 prior to May 2003)

25mm package: ES0040.MIA04A.14K (ES40 prior to May 2003)

40mm package: ES0065.MIA04A.14K (ES65 prior to May 2003)

50mm package: ES0100.MIA04A.19K (ES100 prior to May 2003)

Solenoid valve: Burket 6519 (namur) NB: Pressure limited to

800 kPa (700 kPa with I.S. coil), Voltages (AC/DC): 24, 110, 240

Silencer (std on all packages): SAS brand, SFS series,

Model 2SEP, size ¼"

Isolation valve: Emico valves are available with NPT, BSP thread forms or socket weld ends. Working temperature 0-60°C

#### OneSteel Piping Systems A Business of OneSteel Trading P/L TURNFLO

**6444 9.03**

T3 and T5 (Wafer Body) – T4 and T6 (Lugged Body) Butterfly

Valves, NB 50, 65, 80, 100, 125 and 150mm 1050 2

Note: Valve package includes El-o-matic type ES pneumatic

actuator/Burkert type 6519 solenoid valve, coil voltages

either 240, 110, 28, 24 and 12/VSR quick exhaust-silencer/

APL model 310N limit switch

## TEST STATION SCHEME

|                      |
|----------------------|
| <b>TEST STATIONS</b> |
|----------------------|

### **Advanced Gas Conversions Pty Ltd**

7696            8.10    Static Test Station  
                          Test Station Number 011  
                          Automotive LP Gas Vessels  
                          AS 2337.2 – 2004 – Amdt 1 - Gas Cylinder Test Stations – Part 2: LP Gas Fuel Vessels for Automotive Use

### **All Auto Gas Service**

7677            7.10    Mobile Test Station  
                          Test Station Number 010  
                          Automotive LP Gas Vessels & Welded and Brazed Cylinders  
                          Re-Qualification only  
                          Standards: AS 2337.1 – 2004 Gas Cylinder Test Stations – General Requirements, Inspection and Tests – Gas Cylinders  
                          AS 2337.2 – 2004 – Amdt 1 - Gas Cylinder Test Stations – Part 2: LP Gas Fuel Vessels for Automotive Use

### **Gasmaster LPG Conversions & Repairs**

7719            10.10    Static Test Station  
                          Test Station Number 009  
                          Automotive LP Gas Vessels  
                          AS 2337.2 – 2004 – Amdt 1 - Gas Cylinder Test Stations – Part 2: LP Gas Fuel Vessels for Automotive Use

### **Hammersmith 4 Star Auto Gas**

7439            1.09    Static Test Station  
                          Test Station Number 004  
                          Automotive LP Gas Vessels  
                          Standard: AS 2337.2 – 2004 – Gas Cylinder Test Stations – Part 2: LP Gas Fuel Vessels for Automotive Use

### **Lockhart Management Pty Ltd**

7449            2.09    Static Test Station  
                          Test Station Number 005  
                          Welded and Brazed Cylinders  
                          Standard: AS 2337.1 – 2004 Gas Cylinder Test Stations – General Requirements, Inspection and Tests – Gas Cylinders

### **Sitro Group Australia Pty Ltd**

7374            1.08    Static Test Station  
                          Test Station Number 002  
                          Welded and Brazed Cylinders  
                          Standard: AS 2337.1 – 2004 Gas Cylinder Test Stations – General Requirements, Inspection and Tests – Gas Cylinders

## TYPE TESTED GAS AND ELECTRICAL PRODUCTS

### (Prescribed and Non-Prescribed Articles)

Note: Products listed are certified by AGA for combined gas and electrical product certification.

#### DOMESTIC AND COMMERCIAL GAS APPLIANCES

##### DOMESTIC COOKING APPLIANCES

##### FREESTANDING COOKERS

#### Aga Rangemaster Ltd - Agent: Andi Appliances Pty Ltd

## TYPE TESTED PLUMBING PRODUCTS (WaterMark)

### PPI Corporation Pty Ltd Continued ... ..

#### PPI

Note: Manufacturer: PPI Corporation P/L – 91 Cleveland Terrace, Ottoway SA  
WaterMark Licence No. 1046, Level 1

Expiry Date: 19 September 2011

Standard – AS/NZS 4130 – 2009 – Polyethylene (PE) Pipes for Pressure Applications

7238 11.07 Product Classification: Polyethylene (PE) pipe for pressure applications - water

Brand name: PPI Compound designation: PE 100

Colour: Black or Black with (Blue, White, Purple, Red, Green, Cream, Grey)

stripe or Jacket

(Note: For sewerage applications only, pipe may incorporate internal jacket)

Blue

Classification: Series 1

Note: Manufacturer: PPI Corporation P/L – 256 Star St, Welshpool WA

WaterMark Licence No. 21212, Level 1

Expiry Date: 4 December 2011

Standard – AS/NZS 4130 – 2009 – Polyethylene (PE) Pipes for Pressure Applications

7239 11.07 Product Classification: Polyethylene (PE) pipe for pressure applications - water

Brand name: PPI Compound designation: PE 100

Colour: Black or Black with (Blue, White, Purple, Red, Green, Cream, Grey) stripe or Jacket

(Note: For sewerage applications only, pipe may incorporate internal jacket)

Blue

Classification: Series 1

 Supplied with pump series Reference Part No.'s  
 HM Series  
 2HM3-PF1615/AS, 2HM4-PF1615/AS, 2HM5-PF1622/AS, 2HM7-PF1622/AS  
 4HM4-PF1615/AS, 4HM5-PF1615/AS, 4HM7-PF1622/AS, 4HM9-PF1622/AS  
 2HM3-PF16/AS, 2HM4-PF16/AS, 2HM5-PF16/AS, 2HM7-PF16/AS  
 4HM4-PF16/AS, 4HM5-PF16/AS, 4HM7-PF16/AS, 4HM9-PF16/AS  
 BG Series  
 BGR75-PF1615/AS, BGR100-PF1622/AS, BGM5-PF1615/AS, BGM7-PF1622/AS  
 BGM9-PF1622/AS, BGM11-PF1622/AS, BGR75-PF16/AS, BGR100-PF16/AS  
 BGM5-PF16/AS, BGM7-PF16/AS, BGM9-PF16/AS, BGM11-PF16/AS  
 C Series  
 CAM 70/33-PF1622/AS, CAM 70/34-PF1622/AS, CAM 70/45-PF1622/AS  
 CAM 120/33-PF1622/AS, CAM 120/35-PF1622/AS, CAM 120/55-PF1622/AS  
 CAM 200/33-PF1622/AS  
 CAM 70/33-PF16/AS, CAM 70/34-PF16/AS, CAM 70/45-PF16/AS  
 CAM 120/33-PF16/AS, CAM 120/35-PF16/AS, CAM 120/55-PF16/AS  
 CAM 200/33-PF16/AS  
 Note: Supplied pump does not form part of this certification under ATS 5200.477 - 2006  
 WaterMark Licence No. 60075, Level 1  
 Expiry Date: 28 July 2015  
 Standard: ATS 5200.477 – 2006 – Technical Specification for Plumbing & Drainage Products –  
 Rainwater/Mains Supply Changeover Devices

**Brita GmbH**

7713      10.10      Brita Water Dispenser NCP 884 CP-GM12  
 Watermark Licence No. 60067, Level 1  
 Expiry Date: 7 October 2015  
 Standard: AS/NZS 3718 – 2005 Water Supply – Tap Ware

**Burkert Contromatic Australia Pty Ltd**

7444      2.09      Burkert 2/2 way Solenoid Valve  
 5281 (servo diaphragm): Sizes ½", ¾", 1" BSP- NO & NC  
 6213 (servo assisted): Sizes ¾", ½", ¾", 1" BSP – NC  
 Solenoid options: 6VDC, 12VDC, 24VDC, 24VAC, 110VAC, 240VAC  
 Seal and diaphragm material: EPDM  
 WaterMark Licence No. 60042, Level 1  
 Expiry Date: 10 February 2014  
 Standard: ATS 5200.030 – 2004 – Technical Specification for Plumbing & Drainage Products –  
 Solenoid Valves

**CrocoWatch Control Systems Pty Ltd**

**AQUA AUTOMATION**

7069      11.06      Rainwater/Mains supply changeover device  
 Models: DA-18-300-BU (Float switch – pump supplies – see note 2)  
 DA-CTRL-BU (Float switch – no pump supplied)  
 DA-18-300-BU-US (Ultrasonic sensor – pump supplied – see note 2)  
 DA-CTRL-BU-US (Ultrasonic sensor – no pump supplied)  
 AAUM-19 (Manifold only – no pump supplied)  
 AAUM-25 (Manifold only – no pump supplied)  
 AAUM-19-PC (Manifold & Pump controller – no pump supplied)  
 AAUM-25-PC (Manifold & Pump controller – no pump supplied)  
 Note 1: For models AAUM-19, AAUM-25, AAUM-19-PC  
 & AAUM-25-PC, the Dual Check Valve may be fitted External  
 (upstream of the solenoid) or Internal (downstream of the solenoid)  
 of the main assembly casing  
 Note 2: Supplied pump does not form part of this certification under ATS 5200.477  
 UPC-RW (Manifold only - no pump supplied)  
 WaterMark Licence No. 60005, Level 1  
 Expiry Date: 8 November 2011  
 Standard: ATS 5200.477 – 2006 – Rainwater/Mains Supply Changeover Devices

## TYPE TESTED PLUMBING PRODUCTS (WaterMark)

### JL Industries Inc

7258 12.07 PPP Trap Priming Valve  
 Prime Rite PR-500-AUS DN15  
 WaterMark Licence No. 60010, Level 1  
 Expiry Date: 18 December 2012  
 Standard: ATS 5200.420 – 2005 – Technical Specification for Plumbing & Drainage Products –  
 Trap-priming Valves

### Zhejiang Chaoling Chinaware Valve Co Ltd

7446 4.09 Chaoling Ceramic Cartridges  
 Models: Ø35G1, Ø35S1, Ø40G1, Ø40S1, Ø35G2 360,  
 Ø35S2 360, Ø40G2 360, Ø40S2 360, Ø35G2, Ø35S2, Ø40G2, Ø40S2  
 WaterMark Licence No. 60032, Level 1  
 Expiry Date: 23 April 2014  
 Standard: AS/NZS 3718 – 2005 – Water Supply – Tap Ware

### Global Water Solutions Ltd

7426 12.08 Pressure Wave, Grundfos & ITT Lowara Diaphragm Expansion Tank  
 Pressure Wave Models:  
 10 Bar  
 PWB2, PWB4, PWB 8, PWB 12, PWB 18, PWB 20H, PWB 24, PWB 24H, PWB 35,  
 PWB 35H, PWB 35V, PWB 60H, PWB 60V  
 16 Bar  
 PWB 8-16, PWB 18-16  
 Grundfos Models:  
 10 Bar  
 96528336, 97506558, 96526322, 96528337, 96528339, 96528388,  
 96528340, 96556002, 96528389, 96528341, 96526321, 96528340,  
 16 Bar  
 96528358  
 ITT Lowara  
 10 Bar  
 PWL 8, PWL 12, PWL 18, PWL 20H, PWL 24, PWL 24H, PWL 35,  
 PWL 35H, PWL 60H, PWL 60V  
 16 Bar  
 PWL 8-16, PWL 18-16  
 WaterMark Licence No. 60044, Level 1  
 Expiry Date: 8 December 2013  
 Standard: ATS 5200.485 – 2006 – Technical Specification for Plumbing and Drainage Products –  
 Pressure compensating tank

### Honeywell Limited HONEYWELL

7628 3.10 D06F Pressure Reducing Valves  
 D06F (size)A – Above with threaded male connections, black filter  
 Bowl (up to 40°C) – DN15, DN20, DN32, DN40 & DN50  
 NK295S Combined Pressure Reducing Ball Valve (up and downstream) &  
 Breakflow Preventations  
 DN15 – Additional testing to AS/NZS 2485.1 – 1998 to cover blackflow  
 Prevention device  
 Watermark Licence No. 60028, Level 1  
 Expiry Date: 8 March 2015  
 Standards: AS 1357.2 – 2005 – Amdt 1 – Valves primarily for use in heated water systems –  
 Control valves  
 AS/NZS 2845.1 – 1998 – Water Supply – Blackflow prevention devices – Materials,  
 Design and performance requirements

## TYPE TESTED PLUMBING PRODUCTS (WaterMark)

### Rinnai Australia Pty Ltd

7586 10.09 Rinnai Demand Duo Warm Water Unit for Operation as a Tempering and Thermostatic Mixing Valve  
DDWW32 (utilised with Siemens MXG461B15-0.6, MXG461B15-1.5, MXG461B15-3, MXG461B20-5, MXG461B25-8)  
DDWW50 (utilised with Siemens MXG461B32-12, MXG461B40-20)  
DDWW50 (utilised with Siemens MXG461B40-20, MXG461B50-30)  
Watermark Licence No. 60059, Level 1  
Expiry Date: 8 October 2014  
Standards: AS 4032.1 – 2005 – Water Supply – Valves for the control of heated water supply temperature – Thermostatic mixing valves – Materials design and performance requirements  
AS 4032.2 – 2005 - Amdt 2 - Water Supply – Valves for the control of hot water supply temperature – Tempering valves and end-of line temperature-actuated devices

### JOINTING MATERIALS

#### General

### Smartco Pty Ltd

7574 9.09 Smartco Copper-Phosphorous Brazing Alloy with 2% or 5% Silver  
SGWS2P - 2% Silver, Alloy designation B2  
SGWS5P - 5% Silver, Alloy designation B3  
WaterMark Licence No. 60017, Level 1  
Expiry Date: 1 September 2014  
Standard: ATS 5200.14 – 2004 - Technical Specification for Plumbing and Drainage Products – Jointing Materials

# DIRECTORY OF AGA CERTIFIED PRODUCTS

*January 2014 Edition*

ISSN 1328 – 2700

AGA PRODUCT CERTIFICATION SCHEME

[Please refer to AGA office for entry updates/queries]

**DIRECTORY - 2014**

## IMPORTANT MESSAGES

Whilst every care has been taken to ensure the accuracy of the contents of this Directory, it is important that Certificate Holders and Agents check their respective entries and advise the AGA of any errors and/or omissions. It should be noted that the contact details for individual Certificate Holders and Agents are included under an Index at the back of the Directory.

The Directory is available *free* from the AGA website ([www.aga.asn.au](http://www.aga.asn.au)) and will be republished periodically throughout the year with appropriate changes included. The online Directory may be printed in full, or in part, if required. Please note that hard copies of the Directory are no longer available for purchase from AGA.

To assist in ensuring the accuracy of AGA records, would you please advise of any alterations or corrections by completing the following form and faxing this page to:

**The Manager, Support Services- Fax: (03) 9580 5500**

### PLEASE NOTE CONTACT DETAILS:

**66 Malcolm Road (PO Box 122) BRAESIDE VIC 3195 Tele: (03) 9580 4500 Fax: (03) 9580 5500**

*NB: Where appropriate, please photocopy this form and send/fax a separate page for each Directory entry change.*

## PREFACE

The Australian Gas Association (AGA) manages and operates accredited Product Certification Schemes, with funding largely provided by Certificate Holders through certification fees and badge sales. The AGA is an active participant in the standards writing process with representation on many *Standards Australia* committees that develop and publish the standards that underpin the Schemes.

In addition to product certification services for the electrical and plumbing industries, the AGA certifies gas product for the following categories or any combination of these categories:

Natural Gas  
Town Gas  
Tempered Liquefied Petroleum Gas  
Liquefied Petroleum Gas

Approval for Liquefied Petroleum Gas appliances is divided into three sub-groups, designated as P (Propane), B (Butane) or U (Universal) gas.

### **Product Compliance:**

Product that has been certified by AGA to comply with the requirements of the relevant Code/Standard, is subject to the Rules Governing the Scheme and, if required under the Scheme, is subject to routine and regular audits to confirm continued compliance.

### **Directory Structure:**

AGA now certifies a variety of products, which are subject to one or more specific accredited type-tested schemes. This Directory lists current certificates grouped under the following headings:

- Type Tested Gas Products only
- Gas Cylinder Certification
- Test Stations Certification
- Type Tested Gas & Electrical Products (ie where the AGA Certificate covers an appliance assessed to both gas and electrical standards, eg a cooker with an electric oven and gas hotplates)
- Type Tested Electrical Products only (ie prescribed and non-prescribed articles)
- Type Tested Plumbing Products (WaterMark)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |     |      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |     |
